Private Placement at TPBC: Building Institutional-Grade Planning Structures

Private placement may not suit every investor, but for institutional clients, global citizens, and the ultra-affluent, it offers the ability to build a tailored structure that enhances performance, optimizes tax efficiency, and ensures cross-border compliance within a single, cohesive framework.

Private Placement at TPBC represents a paradigm shift in how advisors approach comprehensive wealth planning. By providing a customizable, Formula One–grade insurance chassis, we combine the tax efficiency of life insurance with unprecedented investment freedom. This isn't about incremental improvement, it's about accessing an entirely different class of planning infrastructure, one that adapts to your clients' global lives, complex asset mixes, and multi-generational objectives with institutional precision.

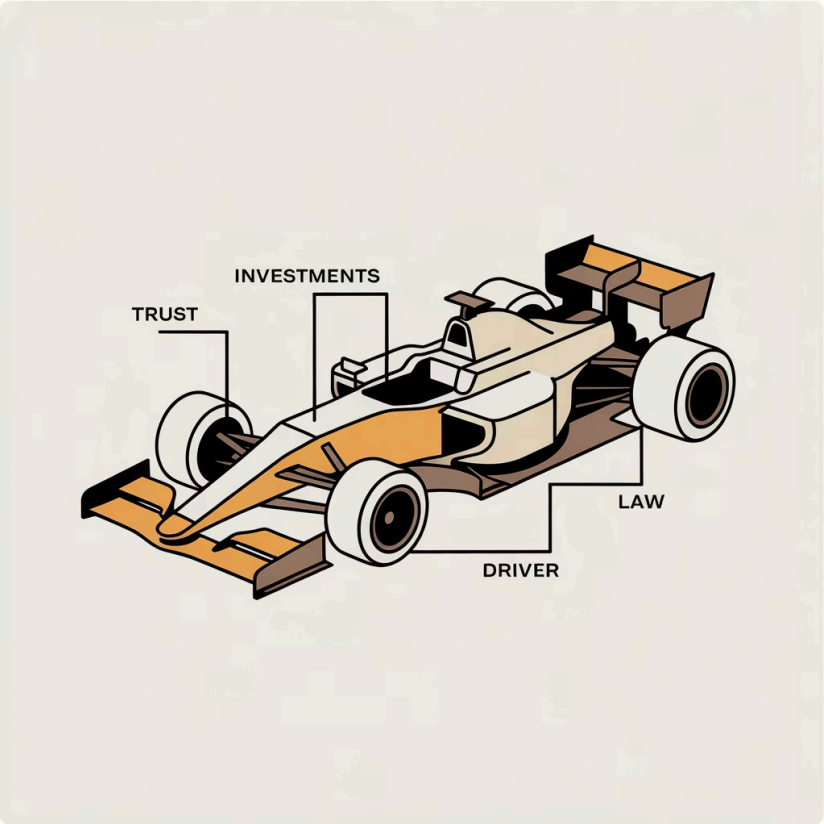
Precision Engineering for Planning Excellence

The Challenge

Standard retail insurance products force advisors into rigid frameworks that rarely align with sophisticated client needs. Cross-border complexity, alternative asset holdings, and evolving family structures demand something more adaptable.

The Idea

Private Placement Life Insurance (PPLI) and Variable Annuities (PPVA) provide fully bespoke wealth and estate structures that move beyond conventional limitations.



Customized Variable Contracts

Investment flexibility & control, tax efficiency, appropriate legal frameworks and regulatory compliance under one unified chassis designed for your specific requirements.

Cross-Border Adaptability

Create strategies that navigate multiple jurisdictions while maintaining structural integrity and compliance.

Tailored to Unique Goals

Address complex asset mixes, family dynamics, and generational transfer objectives with unprecedented flexibility.

Deliver fully bespoke wealth and estate structures tailored to your clients' global lives. Move beyond retail insurance and create cross-border strategies that adapt to unique goals, asset mixes, and jurisdictions, because exceptional clients deserve exceptional planning infrastructure.

Built by Experts. Designed for Advisors.

Collaborate with seasoned architects of private placement structures who bring institutional expertise directly to your practice. Our structuring team comprises specialists with decades of experience in trust law, carrier negotiation, and multi-life policy design, the same framework employed by global family offices and premier investment firms to safeguard and grow generational wealth.

Our advantage lies in leveraging institutional experience to craft structures that typical retail channels simply cannot access. We've negotiated with international carriers, structured complex trust arrangements, and designed multi-life frameworks that optimize every aspect of policy performance. This isn't theoretical knowledge, it's battle-tested expertise applied to your clients' unique circumstances.

01

U.S.-Based Trust Foundation

Remove premium taxes and expand ownership planning through strategically structured domestic trusts that provide legal clarity and operational efficiency.

02

International Carrier Selection

Streamline regulatory oversight and access superior reinsurance markets through carefully vetted international insurance partners.

03

Multi-Life Structure Optimization

Reduce cost of insurance while maximizing cash efficiency through sophisticated policy design that pools risk intelligently.

The result is a planning infrastructure that combines regulatory sophistication with operational efficiency. Your clients benefit from institutional-grade structuring without the complexity typically associated with family office planning, because we've engineered the framework to work seamlessly within your advisory practice.

More Growth. Less Tax. Full Control.

The Power of Tax-Efficient Compounding

Preserve more of your clients' returns through efficient compounding that combines the best of insurance tax treatment with investment flexibility. This is where theory meets transformative practice.

Assets grow **tax deferred**, allowing compound returns to accelerate without annual taxation friction. Distributions can be taken **tax free** through structured loan arrangements, providing liquidity without triggering recognition events. Most importantly, advisors retain full discretion over allocations across traditional equities, alternative investments, private holdings, or real estate, all within a legally recognized insurance framework.

Tax-Deferred Growth

Assets compound without annual tax drag, accelerating wealth accumulation through uninterrupted returns on your full principal balance year after year.

Tax-Free Access

Structured policy loans provide liquidity without triggering taxable events, allowing clients to access wealth while maintaining the tax-advantaged chassis intact.

Investment Control

Maintain complete advisor discretion over asset allocation across traditional, alternative, private equity, and real estate holdings, no insurance company investment restrictions.

Legal Framework

All benefits operate within tested insurance law provisions, providing certainty and predictability for long-term planning horizons.

> "The combination of tax deferral and tax-free access with full investment control represents the ultimate planning trifecta, delivering institutional efficiency without sacrificing advisor autonomy or client customization."

Institutional Access Without the Gatekeeping

Open institutional investment doors for your clients, no billion-dollar minimum required. One of the most persistent challenges in wealth management is accessing truly institutional-quality investments without institutional level commitments. Through our investment platform, advisors gain entry to opportunities that typically are reserved for the largest of family-offices, all structured for insurance chassis compatibility.

Deliver exposure to high-barrier investments through a unified, insurance-compatible platform curated by institutional fund designers. We've removed the gatekeeping that traditionally excludes sophisticated but smaller clients from premier investment opportunities, democratizing access through structured aggregation and compliance alignment.

Institutional Fund-of-Funds

Access professionally designed portfolios specifically structured for insurance chassis deployment, combining multiple institutional managers within a single allocation framework.

Alternative Investments

Gain exposure to private debt, infrastructure, and life settlement IDFs that typically require significantly higher minimum commitments when accessed directly.

Breaking Down Barriers

Enter opportunities that often require tens or hundreds of millions of dollars, made accessible through structured aggregation and compliance alignment that meets insurance regulations, at significantly discounted entry points.

Traditional Gatekeeping

- $50M-$100M minimums
- Limited manager access
- Complex compliance
- Fragmented allocations

Our Platform

- $2M accessible entry
- Curated manager universe
- Streamlined compliance
- Unified infrastructure

Client Benefit

- Institutional quality
- Diversification depth
- Tax efficiency
- Professional oversight

Performance You Can Lock In

Deliver certainty to your clients, even in uncertain markets. In volatile environments, the ability to anchor policy performance through guaranteed rates and structured upside becomes invaluable. Our global platform provides access to private market guarantees that reflect current institutional yields while maintaining long-term flexibility for changing market conditions.

Anchor policy performance and client outcomes through private guaranteed rates and indexed structures that preserve principal while maintaining strategic flexibility. This isn't about sacrificing growth potential,it's about engineering downside protection that allows clients to stay invested through market cycles without fear of catastrophic loss.

Private Fixed-Rate Guarantees

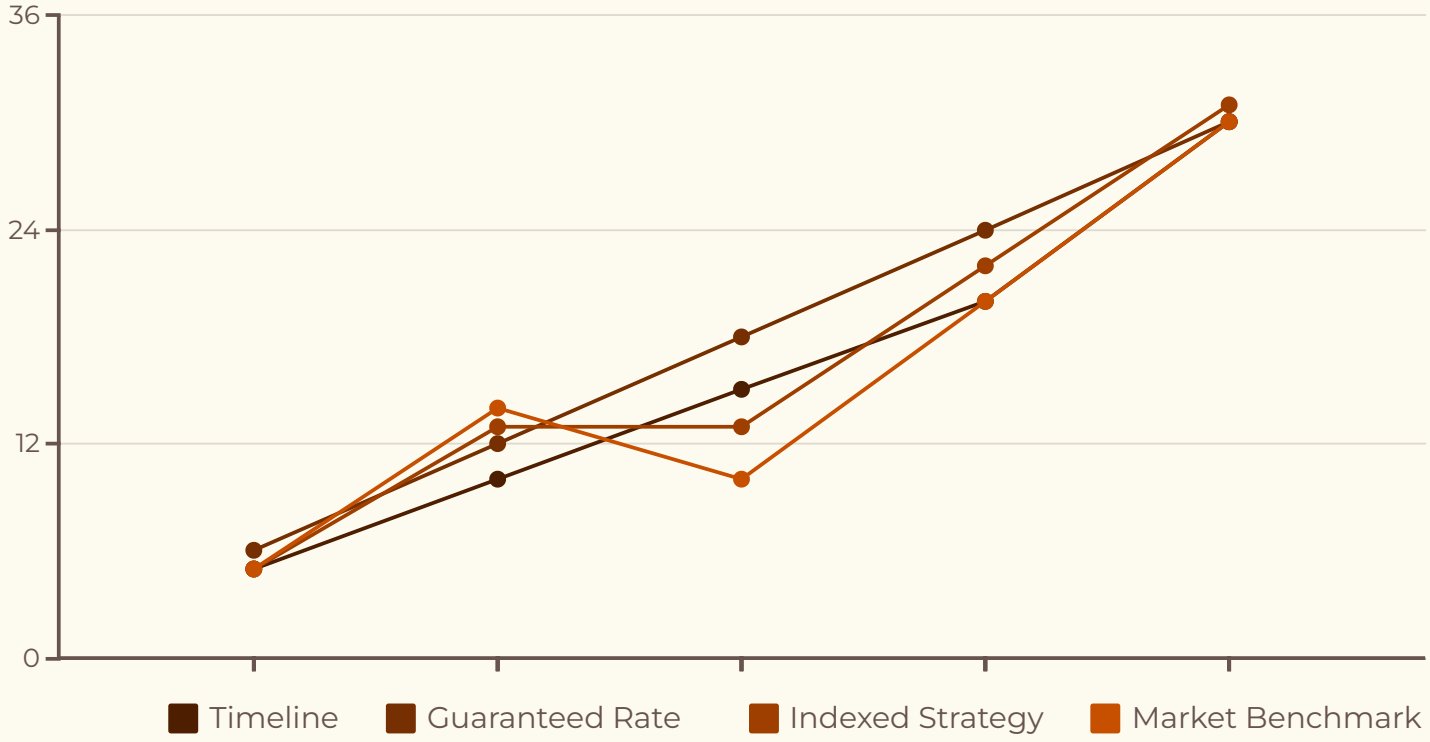
Access guaranteed rates reflecting current private market yields, providing predictable returns that stabilize cost of insurance calculations and policy projections.

Custom Duration Flexibility

Structure lifetime or custom-duration guarantees to stabilize COIs or protect principal based on specific planning horizons and liquidity requirements.

Indexed Performance Plans

Participate in market upside with 0% floors and capped gains, creating structured participation that eliminates downside risk while capturing growth.



The chart illustrates how guaranteed rates provide consistent baseline performance while indexed strategies capture upside with downside protection. Notice how the guaranteed rate remains stable regardless of market conditions, while indexed strategies participate in growth

Designed to Grow Your Practice

Build Deeper, More Durable Client Relationships

Build relationships that drive practice value. Integrated planning structures create sticky, multi-generational relationships and recurring revenue models that compound with your clients' growth. This isn't transactional insurance, it's infrastructure that embeds your advisory practice into the core of your clients' financial lives.

Private placement structures position advisors as architects of long-term wealth frameworks, from trusts to investments to estate planning, producing sustained engagement and renewal revenue that grows as client assets grow. Each policy becomes a platform for ongoing advisory services, portfolio management, and strategic planning that deepens client relationships year after year.

Advisory Dashboard

Centralized visibility into client structures, performance, and planning opportunities that position you as the strategic quarterback.

Multi-Generational Planning

Structures that naturally extend across generations, creating recurring touchpoints and succession planning opportunities.

Recurring Revenue Model

Portfolio management fees, ongoing planning work, and renewal commissions that grow with client asset values over time.

3x

Client Retention

Integrated planning structures demonstrate 3x higher client retention compared to standalone product relationships.

$450K

Average Client Value

Private placement clients generate significantly higher lifetime advisory fees through comprehensive structure management.

15+

Years of Engagement

Multi-generational structures create planning relationships spanning decades, not transaction cycles.

Infinite Planning Configurations

Serve any client, in any market, with total adaptability. The true power of private placement lies in its configurability, the ability to blend estate, income, and liquidity strategies under one cohesive and compliant structure, whether deployed onshore or offshore. This flexibility allows advisors to address virtually any planning objective without forcing clients into predetermined boxes.

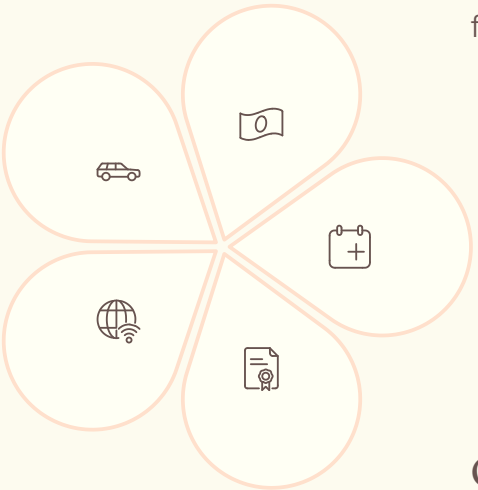
Private placement structures adapt to client needs rather than forcing needs to adapt to product limitations. Whether a client requires estate exclusion for wealth transfer, guaranteed income for retirement, liquidity for business succession, or cross-border flexibility for international families, the chassis remains constant while the configuration changes to match specific objectives.

Estate Planning

Configure for inclusion or exclusion based on generation-skipping strategies and family wealth transfer goals.

Liquidity Generation

Structure tax-efficient distributions through policy loans or withdrawals for business needs or lifestyle funding.



Timed Distributions

Design systematic withdrawal schedules aligned with retirement, education funding, or business succession timelines.

Global Deployment

Implement U.S. or international structures based on residence, citizenship, asset location, and planning jurisdiction requirements.

Guaranteed Income

Create predictable income streams through annuitization or structured withdrawal frameworks with lifetime guarantees.

> "Private placement isn't a product category, it's a planning platform. The same chassis that powers estate exclusion can be reconfigured for income generation, liquidity access, or cross-border compliance. It's infrastructure that adapts to life, not life that adapts to infrastructure."

The $2M Championship Structure

Build Your Winning Framework

With a **$2M seed investment**, you can construct a fully transparent, guaranteed, multi-layered structure that delivers institutional capabilities to your clients. This isn't just about meeting minimums, it's about accessing a complete planning ecosystem designed for performance, clarity, and longevity.

Your championship-winning structure features institutional investment access, guaranteed rates and loan terms, advisor-controlled allocations, tax-efficient growth, and multi-generational planning continuity, all documented, transparent, and built to last.

Institutional Investment Access

Entry to fund-of-funds, alternatives, and private markets typically requiring $60M+ direct minimums.

Guaranteed Terms

Lock in rates, fees, and loan provisions that provide certainty across changing market and regulatory environments.

Advisor Control

Maintain full discretion over asset allocation, rebalancing, and strategic positioning without insurance company interference.

Tax-Efficient Growth

Compound returns tax-deferred with tax-free access through policy loans—preserving more wealth for clients and heirs.

Multi-Generational Continuity

Structure transfers seamlessly across generations with estate planning integration and succession frameworks built in.

Build Your Championship-Winning Team

Achieve elite outcomes for your clients, and your practice. Private Placement at TPBC equips advisors with the structure, legal integrity, and institutional access needed to deliver multi-generational wealth strategies that perform under any condition. We've engineered every component, from trust formation to reinsurance access to investment compliance, so you can focus on what you do best: advising clients and growing your practice.

Structuring Expertise

Decades of institutional experience designing trusts, policies, and multi-life frameworks for family offices and investment firms.

Carrier Relationships

Direct access to international carriers and reinsurance markets that most advisors cannot negotiate independently.

Investment Platform

Curated institutional fund access with insurance compliance built in, removing barriers to premium investment opportunities.

Legal Framework

Tested structures that operate within established insurance law, providing certainty for long-term planning horizons.

Private Placement at TPBC isn't about building a product.

It's about building a championship-winning team to drive it.
